Mohammed Salma

Full-Stack Developer · React & Laravel | Gaza, Palestine

mohsalma.mt@gmail.com | +970 597 055 842 | linkedin.com/in/m0hamed-salma | github.com/Mohammed-Salma

SUMMARY

Full-stack developer who builds complete web applications with React on the front end and Laravel on the back end. Experienced in designing REST APIs, modeling relational databases in MySQL, token-based authentication and Stripe payments. Led a five-person team to deliver Masar, a community services and marketplace platform for Gaza.

TECHNICAL SKILLS

Frontend	React, JavaScript (ES6+), HTML5, CSS3 / SCSS, Bootstrap, Tailwind CSS, React Router, React Hook Form
Backend	PHP, Laravel, RESTful APIs, Laravel Sanctum, Eloquent ORM, role-based access control
Database	MySQL, schema design, migrations
Tools	Git, GitHub, Postman, Vite, Stripe API, Figma · Agile, clean code, API testing

EXPERIENCE

Software & Technical Engineer - Modern Technology Company, Gaza — 2023 - Present

- Develop, configure and maintain queue management systems for client service centers.
- Install, set up and support banking and office equipment and UPS power systems for business clients.
- Diagnose and resolve hardware and software issues on site, keeping client operations running.

Back-End Developer (Intern) - Areisto, Gaza (Remote) — Dec 2024 - Sep 2025

- Completed an intensive 90-hour Laravel program covering the full lifecycle: planning, database design, implementation and testing.
- Built back-end features with Laravel and MySQL, including authentication, CRUD modules and REST endpoints.

PROJECTS

E-Commerce Platform - React 19 · Laravel 12 · MySQL · Stripe Frontend · Backend — Sep - Oct 2026

- Built a full online store with a decoupled React (Vite) storefront and a Laravel REST API.
- Implemented token authentication with Laravel Sanctum and role-based middleware separating customers and admins.
- Integrated Stripe Payment Intents for secure card checkout, with order confirmation and order history.
- Developed an admin dashboard to manage products (multi-image gallery, sizes), categories, brands, orders and shipping.
- Built the storefront: category and brand filters, product pages, persistent cart, checkout and customer profile.

Masar - Community Services & Marketplace Platform - Laravel · React · MySQL — Dec 2024

Graduation project · Team Leader & Back-End Developer

- Led a five-person team through an Agile process from requirements and design to testing and deployment.
- Built the Laravel REST API behind an interactive map that helps Gaza residents find markets, banks, exchanges, gas points and aid centers.
- Developed a local marketplace where sellers list products and buyers contact them directly.
- Implemented three roles (user, seller, admin) with seller verification, store and product approval, reports and announcements; tested all endpoints in Postman.

EDUCATION

B.Sc. in Software Engineering - University of Palestine, Gaza — Sep 2020 - Oct 2025
